Art Unit: 1761

The terminal disclaimer submitted has been entered and the provisional double patenting rejection has been dropped. The rejection of the claims over Rogers has been dropped in response to applicants' arguments relating to the claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-24 & 32-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zawistowski (2002/0048606) for reasons of record.

Applicant argues that Zawistowski teaches away from the use of homogenization at paragraphs 23 & 24. This argument has been considered but is not persuasive. The cited passages refer to "traditional homogenization". In example 1, the same microfluidization process of paragraphs 23 & 24 are also called homogenization. No difference is seen between the homogenization of the reference and the homogenization of the claims.

Claims 1-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoon (2002/0064548) for reasons of record.

Applicant argues that Yoon requires emulsifiers and applicants' invention does not require emulsifiers. This argument has been considered but is not persuasive because the claims are open to the inclusion of emulsifiers.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone
